INTRODUCTION ; WHO WE ARE

- SenExpert Global Oilfield Service LLC is a fully Nigerian-owned oil tool oilfield services and engineering firm committed to providing top-notch solutions for the oil and gas industry
- SenExpert was founded to offer integrated project management, well engineering, well completion, production optimization, Marine logistics services and General procurement and supplies services.
- SenExpert blends deep local insight with global technical expertise. The breadth and depth of SenExpert Global knowledge , experience, and practical expertise in the oil and gas sector are very beneficial.
- Our Team of seasoned upstream experts with over 60 years of combined experience leading the oil and gas in Integrated project management, well completions, workover, well intervention (CWI), and oil tool rental/procurement services
- SenExpert Global Oilfield Service LLC is committed to being the best indigenous service providers in the Nigerian oil and gas value chain.
- Our partnership with major OEM ensures timely, efficient and flawless delivery of services.
- Recently sign strategic partnership with Veltman Oilfield Service LLC

Clients we have worked for
Directly and indirectly:

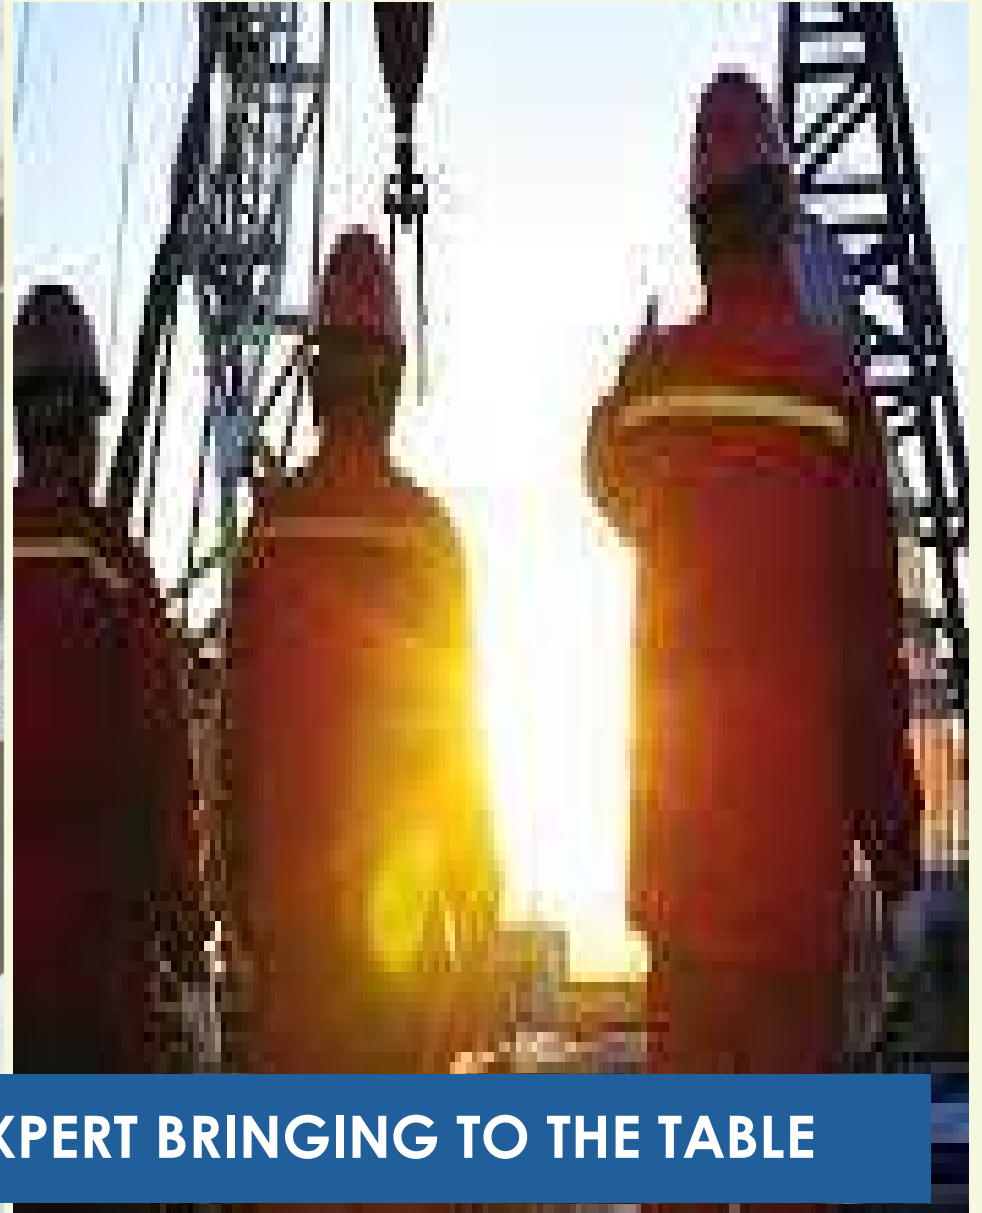

Technical OEM Partners:

Weatherford

WHAT IS SENEXPERT BRINGING TO THE TABLE

WHAT IS SENEXPERT BRINGING TO THE TABLE ?

- Full support from OEM and Technical partners for all Clients completions tools design, manufacturing and installations
 - On the Go response and solution provision to client's project request.
- Access to OEM inventory for quick delivery of critical completions tools/accessories
- In Country Owned inventory for a variety of OEM's completion tools for on-the-spot makeup during unplanned operations/ project requirements.
 - Saves Customer's project time up to 8 weeks or more waiting for tools from OEM manufacturing plant
 - Cost Saving for our client as the urgency of going through OEM manufacturing plant and its induced high cost is eliminated.
 - Local One Stop shop solutions for unplanned project/operations needs.
 - Successfully installed Bridge plug and Cement retainer for Chevron.
 - Successfully deployed DLT packer in 3 Chevron location
- Our Team of experience workforce possess strong technical expertise to manage our clients project from project planning, QAQC, Execution, and closeout.
 - Coordinated and managed Wild Well control remediation of several wells in OML-018 when in Eroton.

WHAT IS SENEXPERT BRINGING TO THE TABLE ?

- Our experience in project planning and management coupled with in-depth knowledge of completion tools systems and deployment delivers cost effective technical solutions to produce live crude for our clients.
- Delivery of Client's project within plan budget and time frame; Eyrie Energy (Igbomotoru-3 Well)
 - Cost friendly tools design and efficient completion/intervention solutions
 - Well flowed to 1, 800 bopd and ongoing plan to hook up wellhead to flowline/FSO
- Major supplier of completion accessories to Sterling Global and other indigenous oil producing companies
 - Currently running a P.O worth \$ 1.1M for the supply of sizes 3 ½'' and 2 7/8'' Gas Lift Mandrels (GLM)
 - Currently running a P.O worth over \$ 1.5M for the supply of sizes 3 ½'' and 4 ½'' Baker Model SCSSV
 - Successfully deployed 4qty Bridge plug and 4 qty cement retainer across Sterling Global operations location on a call out basis.
- Committed to developing and training our own indigenous engineers.
 - Currently have 10 NYSC Member serving with SENEXPERT as a way of giving them exposure to the oil and gas industry.
 - 4 past NYSC Core members employed as part of our young engineer's workforce

NOTABLY EXECUTED PROJECTS

- Successfully delivered Igbomotoru-3 (IGBN-3) Integrated Project management (IPM) for well re-entry and re-completion operations for Eyrie Energy limited from in September 2025.
- Successfully completed Seplat Orogho-10 Lower completion (On Behalf of Multi Integral Limited) from 25th April to 3rd May, 2025.
- Successfully completed Seplat Orogho-11 Lower completion (On Behalf of Multi Integral Limited) from 7th June to 14th June, 2025.
- Successfully installed expandable screens (On behalf of Matpatson) in Ogbanabou-2 for Kaim-Marine Petroleum services from 10th July 2024 to 16th July 2024
- Partner with Mansfield Energy to Installed dual string upper completion in Okpohuru-8 for Seplat Energy, May 2024
- Partner with Mansfield Energy to Installed dual string upper completion in Ovhon-4 for Seplat Energy, Jul - August 2025
- Partner with Mansfield Energy to Installed Single string upper and lower completion in Ugheli-42 for ND-Western, 13th Jul – 31st Jul, 2023
- Successfully Superintended and delivered Igbomotoru-02 (IGB-02) Well re-entry and completions program while with Alpharetta to produce ~2000BOPD for BAP Energy using HWU.

NOTABLY EXECUTED PROJECTS..Cnt'd

- Successfully delivered Okoro-01 well re-entry & initial dual completions for Anatolia Energy to produce ~1500BOPD with HWU.
- Successfully superintended over the re-entry operation in APANI-1 for Matrix Energy to produce live crude (Land Rig) while with Alpharetta.
- Partner with Mansfield Energy to Installed Single string upper and lower completion in Ugheli-46 for ND-Western, 14th April – 27th April, 2023
- On going Installation of 3-zones Lower completion Stand-alone screens in Seplat Amukpe-6 well (On Behalf of Multi-Integral Limited)
- Coordinated and managed Wild Well control remediation of several wells in OML-018 when in Eroton.
- Major supplier of completion accessories to Sterling Global since 2024.

EQUIPMENT INVENTORY

EQUIPMENT INVENTORY....Cont'd

VISION STATEMENT

To be Nigeria's leading indigenous oilfield service company, recognized for technical excellence, operational integrity, and sustainable value creation.

To provide innovative and efficient oilfield solutions through professionalism, technology, and commitment to quality, safety, and environmental responsibility.

MISSION STATEMENT

SERVICES AT A GLANCE

Well Completion Services

SenExpert Global Specializes Offering engineering and Technical Solutions To our Clients In:

- Well completion Services
- Completion design and modelling
- Artificial lift design and services
- Well Integrity management
- Oil Tools completions equipment and accessories supply.
- Huge inventory of OEM certified completions oil tools and accessories
- Completion consultancy and technical support services
- Completion tubular supply

Project Management Service

We provide integrated Project Management (IPM), which includes;

- Front End Engineering Design.
- Project planning and Coordination
- Quality Assurance and Control
- 3rd Party/Vendors equipment certification/acceptance criteria
- Project execution supervision

Key deliverables includes but not limited to;

- Produce Project timeline Estimate
- Project execution work program
- QAQC documentation
- Facilitate CWOP and AAR
- Produce End of Well Reports

Well Intervention

Our Expertise in well services Includes; Well interventions, Idle well re-activation, wellhead remediation services etc. This is achieved through;

- Slickline & Wireline/E-Line operation
- Wellhead Services (Supply and Maintenance.
- Coil Tubing (Nitrogen Lift, Acid Stimulation, Fishing)
- Water/Gas Shut-off
- Hot Oil dewaxing
- Gaslift retrofit
- Cement Packer Technology
- We specializes in Short Term Oil Gain (STOG) operations to revive existing wells for optimized and sustained production

Oil Tool / OCTG Procurement

We are OEM service contractor for the procurement and distribution of industrial drilling and completion tool

- We coordinate and supervise OEM tools installation/deployment.
- We have OEM stock holding/ inventory for prompt or just-in-time delivery of critical services equipment.
- We have the means to procure certified OEM material from a wide supplier/stocklist network worldwide.
- We procure and supply OCTG such as Casing Pipes, Completion Tubins, Pup Joints, Screens and Blank pipes etc.

CORE OFFERINGS

WELL COMPLETION SERVICES

SenExpert Global energy services is a specialized oilfield solutions provider focused on delivering advanced well completion and production optimization services to the upstream energy sector.

We offer end-to-end capabilities in the design, supply, and execution of well completions, encompassing:

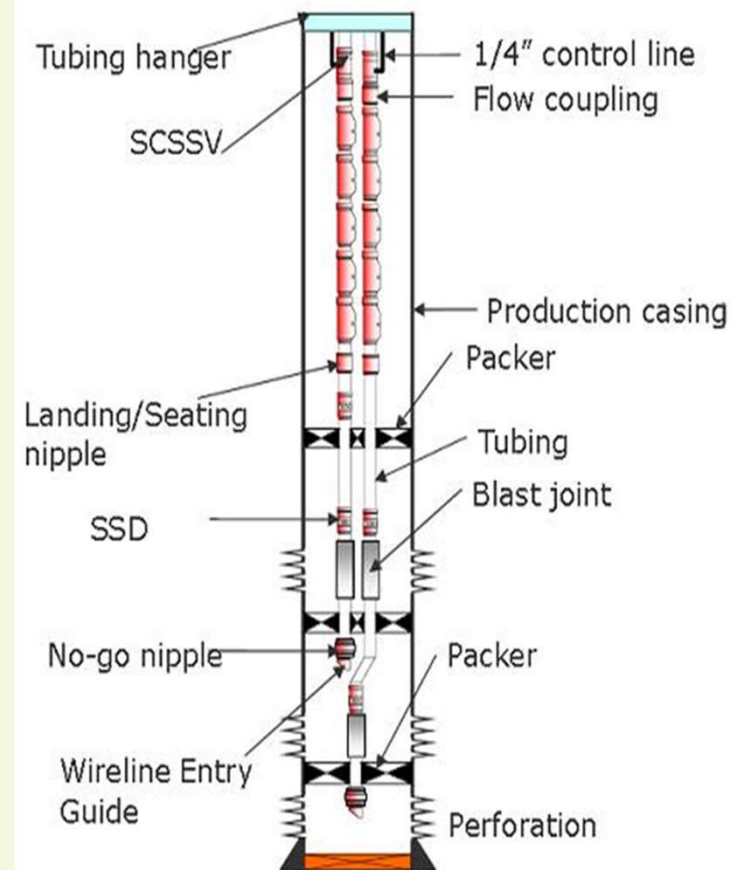

- Sand Control Solutions (gravel pack, screens, and inflow control systems)
- Intelligent Completions (real-time reservoir monitoring and remote flow control)
- Dual and Multizone Completions
- Artificial Lift Systems (ESP, gas lift, and hydraulic lift design and implementation)
- Well Integrity Management (diagnostics, remediation, and integrity assurance programs)
- Oil Tools Supply — Huge in-country range of OEM completions equipment and accessories

Our engineering expertise extends to:

- Completion Design and Modelling
- Artificial Lift Design and Optimization
- Chrome Alloy and HPHT Completions equipment Supply for gas and high-pressure wells
- OEM-Certified Inventory of completion tools and accessories, ensuring reliability and traceability across operations.

Driven by innovation and a commitment to operational excellence, Sinexpert Global Oilfield Service LLC combines deep technical know-how, OEM partnerships, and field experience to deliver reliable and cost-effective completion solutions that enhance well performance and production sustainability.

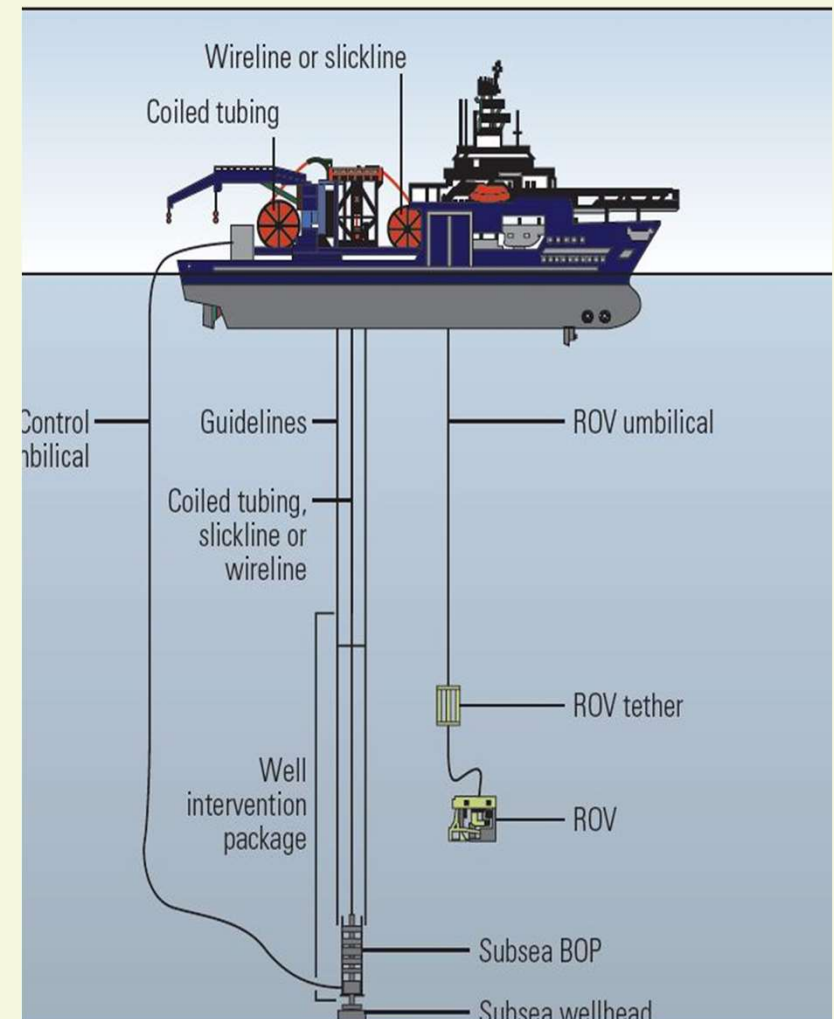

Well Completion Equipment

WELL INTERVENTION SERVICES

SenExpert Global energy Services specializes in comprehensive well services including well intervention, idle well reactivation, wellhead remediation, and maintenance.

- Our core expertise lies in Short-Term Oil Gain (STOG) operations, aimed at reviving existing wells to achieve optimized and sustained oil production for our clients.
- In collaboration with Client's subsurface teams, we evaluate and implement the most effective well intervention strategies to restore production and enhance recovery.
- Our well Intervention expertise is in
 - Slickline Services
 - Electric/WireLine Service
 - Coiled Tubing Services
 - Specialized Interventions Services

WELL INTERVENTION SERVICES....Contn'd

Slickline Service

- Gauge Cutter, Broach, & Obstruction Removal
- Plug & Flow-Control Device Setting / Retrieval
- SSD (Sliding Sleeve) Shifting for Zonal Control
- Downhole Pressure & Temperature Surveys (Memory Gauges)
- Tubing Drift & Bottom-Hole Clearance Checks
- Fishing & Retrieval of Dropped Objects / Wire / Tools
- Running / Pulling Gas Lift Valves

Electric/Wireline Service

- Production Logging (PLT) & Reservoir Diagnostics
- Cased-Hole Logging – PNL, CBL/VDL, RBT, MIT, C-O e.t.c.
- Perforating & Re-Perforation Programs (TCP Integration)
- Setting & Pulling of Plugs, Packers & Flow-Control Devices
- Well Integrity Evaluation – Corrosion / Leak Detection
- Downhole Camera Runs & Imaging
- Memory & Real-Time Data Acquisition

Coiled Tubing Services

- Wellbore cleanout: Removal of wax, sand, & debris
- Nitrogen Lift Operations
- Acid stimulation/Matrix acidizing
- Milling & Jetting
- Complex Fishing Operation
- Cement Placing and Plugging
- Logging and Real time monitoring

Specialized Services

- Water & Gas Shut-off
- Gaslift Retrofit
- Cement Packer Technology
- Through-tubing well intervention
- Wellhead remediation, repairs, maintenance and supply
- Marine logistics operation
- Wild Well Intervention consulting
- Wellhead platform Refurbishment

PROJECT MANAGEMENT SERVICES

At SenExpert Global Energy Services, we provide Integrated Project Management (IPM) solutions that enable clients to execute complex oilfield projects efficiently, safely, and within budget. Our IPM model brings together technical expertise, operational experience, and structured project governance to ensure seamless project delivery from planning to closeout.

We take full responsibility for coordinating multidisciplinary teams, aligning project objectives, and maintaining continuous communication between the client, subsurface, and surface operations teams to achieve optimal results.

IPM OFFERINGS

- **Project Planning & Design:** Collaborating with client's surface and subsurface teams to define scope, objectives, and execution strategies.
- **Quality Assurance & Quality Control (QA/QC):** Managing equipment inspection, certification, and compliance to international standards.
- **Execution Supervision:** Providing on-site project engineers, supervisors, and QAQC personnel during field execution to ensure operational excellence and safety.
- **Project Documentation & Reporting:** Delivering all operational documentation, records, and reports for audit and knowledge retention.
- **Coordination with Vendors & Contractors:** Managing logistics, scheduling, and contractor performance across service lines to ensure alignment with project milestones.

KEY PROJECT DELIVERABLES

Our project management services produce the following key deliverables:

- Comprehensive Project Timeline & Cost Estimate
- Detailed Project Execution Program / Work Plan
- QA/QC Documentation and inspection reports
- Facilitation of Completion of Well on Paper (CWOP) and After-Action Review (AAR) sessions
- End of Well Reports (EOWR) and full project closeout documentation

OPERATIONAL ADVANTAGE

- Proven experience managing multi-well and brownfield optimization projects
- Strong integration between engineering, logistics, and field execution teams
- Transparent performance tracking through detailed progress and cost reporting
- Adherence to API Q2 and ISO 9001:2015 quality management frameworks
- Focus on value creation, risk reduction, and production optimization

OIL TOOLS /OCTG PROCUREMENT SERVICES....Contn'd

CORE CAPABILITIES

- Global Procurement and Supply services
- 1. Energy, Oil and gas procurement and supplies
- 2. OCTG procurement and supplies
 - i. Casings pipes
 - ii. Completion tubing
 - iii. Pup joints etc.
 - iv. Drill pipes
- 3. Drilling accessories
 - i. Liner Hanger/Liner Packer
 - ii. Bridge plugs
 - iii. Cement Retainers
- 4. Construction and industrial procurement and supplies

OIL TOOLS /OCTG PROCUREMENT SERVICES

SenExpert Global Energy Services operates as a trusted OEM service contractor for the procurement, rental, and distribution of world-class industrial drilling and completion tools and equipment. Our goal is to ensure that clients receive the right tools—on time, on specification, and ready for safe deployment in demanding field environments.

We combine global sourcing capability, OEM partnerships, and local inventory support to provide a reliable supply chain that keeps operations running without delay. Our services extend beyond procurement — we also provide installation, deployment supervision, maintenance, and technical support for all equipment supplied.

➤ **CORE CAPABILITIES**

- Procurement of Certified OEM Equipment: Direct sourcing from original equipment manufacturers and accredited global suppliers, ensuring full traceability and material certification.
- Oil Tools Rentals: Short- and long-term rental of completion, well intervention, and pressure-control tools for onshore and offshore operations.
- Inventory Management & Stock Holding: Strategic local warehousing of high-demand tools and spares for just-in-time (JIT) delivery and reduced lead times.
- Installation & Deployment Support: Field engineering and technician support for on-site installation, commissioning, and tool redress operations.
- Quality Assurance & Documentation: Full QA/QC process covering inspection, calibration, and certification in accordance with API, NACE, and ISO standards.
- Supply Chain Optimization: End-to-end logistics coordination—from vendor sourcing to site delivery, leveraging our global supplier and stockist network.

PRODUCT RANGE

- Drilling and Completion Equipment (Sand Screens, Packers, SSDs, Nipples, Plugs, Flow Control Devices)
- Wellhead and Pressure Control Equipment (Valves, Chokes, BOP Accessories)
- Tubulars and Accessories (Casing/Tubing, Pup Joints, Crossovers, Landing Nipples)
- Sand Control and Artificial Lift Equipment
- Slickline, E-line, and Coiled Tubing Intervention Tools
- Fishing jar, drilling tools, Wellbore cleanup and Filtration equipment

OPERATIONAL ADVANTAGES

- Established partnerships with leading OEMs and certified distributors worldwide
- Regional stockholding in Nigeria for critical well equipment and spares
- Proven logistics and customs-clearing experience for efficient importation
- 24/7 technical and operational support for rental and deployment services
- Commitment to quality, reliability, and rapid response in support of drilling and completion operations

NOTABLE EXECUTED PROJECTS

THE TEAM

PROJECT TEAM

Usen Emmanuel is the Chief Executive Officer of SenExpert Global Energies, a seasoned Petroleum Engineer with over 20 years of progressive experience in the oil and gas industry, spanning drilling, completions, and well intervention operations.

He began his career with ExxonMobil, where he developed a strong technical foundation in production optimization, well integrity management, and field development planning. His drive for operational excellence and innovation later led him to Baker Hughes, where he gained extensive expertise in sand control, intelligent completions, coiled tubing, and electric-line interventions, supporting major offshore and onshore projects across West Africa. He later joined Halliburton, Mexico in 2014 as Technical Advisor, where he was in charge of all technical projects in completion operations across the GOM. In 2018 he joined Melvon Nigeria as Operations Manager, a position he held till 2021 when SenExpert Global Energies kicked off. A results-driven leader, Usen is passionate about operational efficiency, innovation, and local content development. He has built a reputation for integrating engineering precision with strategic leadership, driving performance improvement and sustainable value creation in complex field environments.

In founding SenExpert Global Oilfield Services LLC, Usen brought together his deep technical knowledge, industry network, and leadership experience to create a company built on technical excellence, safety, and reliability. Under his leadership, SenExpert has established itself as a trusted partner for operators seeking efficient, cost-effective well solutions and Short-Term Oil Gain (STOG) optimization programs.

Usen's management philosophy is anchored on engineering discipline, innovation, and capacity development, empowering local professionals while delivering world-class well services. His leadership continues to drive SenExpert's mission of transforming well service delivery through precision, quality, and performance.

PROJECT TEAM

Ubong Udofia is a seasoned Well Engineering and Project Management professional with over 18 years of multidisciplinary experience in the oil and gas industry, spanning well completions, workovers, interventions, and field development operations across both onshore and offshore assets.. He is the Chief Technical Officer for SenExpert Global Energies Ltd.

A Stanford certified Project Manager who currently serves as the Chief Operating Officer and Technical Director of Veltman Oilfield Services and also leads Sinexpert Global Oilfield Services LLC, where he oversees integrated well service delivery, completions engineering, and project management for major upstream clients and independents.

Ubong's expertise covers advanced completions design, coiled tubing and slickline interventions, sand control, intelligent completions, well integrity restoration, and short-term oil gain (STOG) optimization programs. He has successfully directed numerous multi-well re-entry and workover campaigns in collaboration with top-tier service companies such as Schlumberger, Baker Hughes, Halliburton, and Cameron, ensuring technical excellence, safety compliance, and production optimization.

A results-driven leader, Ubong is passionate about operational efficiency, innovation, and local content development. He has built a reputation for integrating engineering precision with strategic leadership, driving performance improvement and sustainable value creation in complex field environments.

He holds a Bachelor's degree in Mechanical Engineering from the Federal University of Technology, Owerri (FUTO) and is currently pursuing an Executive MBA at Imperial College Business School, London, with focus areas in Technology, Entrepreneurship, and Innovation.

PROJECT TEAM

Tony Uzuazor Oboezi is a seasoned Field Service Manager with over 15 years experience as a High-Performing Wellsite lead completions supervisor responsible for the delivery of safe and efficient completion solutions.

He has extensive proven field experience in :

- Single and multiple string completion systems
- Open and cased hole completion systems
- Horizontal and sand control completion systems. Etc.
- Project planning and execution in well interventions
- Crew management and team competence development

Tony has been involved with numerous planning and execution well completion solutions in various rig locations such as land, swamp and offshore environments. His experience in crew management, operations coordination, cost reduction strategy, risk management and incident reduction to deliver flawless and efficient completion solutions to clients is laudable.

Tony began his career with Halliburton and a field engineer and grew through the ranks to lead wellsite completion supervisor. Currently he has worked across all SenExpert Global operations delivering cost effective and efficient solutions to our client in completion and well engineering.
